Assumptions

AREA	ASSUMPTION
Currency	Internal calculations remain in USD. Display currency is USD; EUR exchange rate is 0.8514.
Basic mode	Plastic weight and component units are estimated from material category conversion factors.
Advanced mode	Plastic weight, component units, and PCR percent are entered explicitly and used for eco-modulation.
California	California CMC rates in the library use the CAA illustrative low/high fee schedule stored as cents and converted to dollars during calculation.
State rates	Rate values are planning estimates and should be reconciled with final producer obligation statements before filing.
